

860678540 | PIM-GUARD MONOPOLE PLATFORM SKEW ADAPTER

PIM-Guard Skew Adapter for Monopole Platforms to enable up to 20 degrees of Skew Correction

-Standoffs for existing monopole platforms that allow antennas to be skewed from the face of the tower by up to 20 degrees and keep the rear of the antennas on the same plane.

-Enables monopole platforms to meet carriers "zero skew" requirements. Azimuths that are not 120 degrees of separation on a 3-sided monopole platform are not able to meet this goal without the PIM-Guard Skew Adapter.

- A PIM-Guard Skew Adapter is required for each antenna pipe that must be extended from the tower face. Antenna pipes and U-Bolts are assumed to be provided as part of existing Monopole Platform and not included with this kit.

-Optional Tie-back kit available for additional structural support: SKA-TBK

Product Classification

Product Type	Support kit
Product Brand	PIM-guard
Product Series	G2

General Specifications

Mounting	Round member
Pipe, quantity	0

Dimensions

Mounting Diameter, maximum	88.9 mm 3.5 in
Mounting Diameter, minimum	60.325 mm 2.375 in
Stand-off Distance	1,358.9 mm 53.5 in

Material Specifications

Material Type	Hot dip galvanized steel
----------------------	--------------------------

Mechanical Specifications

Wind Rating	For Specifications, please contact steelproducts@commscope.com or call 800-255-1479
