# Broadcast Connectors

## Coax Connectors

The CommScope line of connectors was designed to simplify installation while providing the ultimate in performance. The CommScope BNC, F and RCA connectors share common crimp dimensions which eliminates the need to have different tools on site. In addition the connectors also use the same strip dimensions which to reduce installation time when multiple connector types are required.

### Types of Connectors

- BNC
  - Straight BNC Plugs
  - Right Angle Plugs
  - Bulkhead Jacks
- F Connectors
- RCA
- LCC Connectors

## Broadcast Connectors

### Coax Connectors – Straight BNC Connectors

---

CommScope's true 75  $\Omega$  BNC connectors are the most reliable and universally accepted method of terminating coaxial cable in the market today. Outstanding electrical performance is achieved by unique design elements in the industry's truest 75  $\Omega$  connector. Precision-molded insulators with locking gold-plated center conductors ensure true 75  $\Omega$  characteristic impedance. Innovative features result in significant reduction of impedance mismatch throughout the network and improved transmission reliability in digital applications.

An idea whose time has come, the new notched BNC series from CommScope makes it easy to spot BNC connectors that are not properly latched to BNC jacks. This is especially helpful with high-density coax panels such as CommScope's midsize video product offering where terminations are very tight, and in the back of dark racks.

## Features

- Designed to exceed the rigorous demands of today's telecom, CATV and broadcast environments including SMPTE 424M 1080p, 259, 274, and 292M standards
- Outstanding electrical performance beyond 3 GHz
- Gold-plated, locking center conductor
- True 75 $\Omega$  characteristic impedance end-to-end
- .625" crimp sleeve for greater pull-off force
- Compatible with hex, square, and 12-point crimp tools and select competitive crimp tools and die sets
- 100 percent guided mating
- Tarnish-resistant, nickel-plated body and machine bayonet
- Sizes for multiple cable type
- Meets or exceeds MIL-C-39012 requirements
- 100% North American/European precision components
- Strip lengths common between sizes and types (except for Belden 7731/CommScope 7530, RG11 Cable)

## Broadcast Connectors

## Coax Connectors – Right Angle BNC Connectors

### Features

- Right angle design alleviates stress associated with bending cable
- Provides increased density and Improves overall cable management
- Bulk packaging available
- Center conductor pins and crimp sleeves are fully interchangeable with CommScope's straight plugs for same cable type

### Ordering Information

## Straight/Right Angle BNC Connectors

### Electrical

- Characteristic Impedance:** 75 Ω
- Voltage Rating:** 1000 Volts RMS
- Insertion Loss:** < 0.6 dB 1 MHz to 1 GHz (measured with 1 meter of 728 cable)
- Return Loss:** Better than 35 dB to 1 GHz; 30 dB to 2 GHz; 26 dB to 3 GHz
- Contact Resistance:** .030 Ω maximum change post environmental
- Insulation Resistance:** 200 MΩ minimum change

### Mechanical

- Mechanical Durability:** 500 cycles minimum
- Center Contact Retention:** 6 lbs. min
- Coupling Mechanism:** 100 lbs. min
- Cable Pulloff Force:** Dependent on cable size
- Cable Bend and Twist:** 500 cycles min
- Force to Engage/Disengage:** Torque 2.5 in/lb max; longitudinal force 3 lbs. max
- Interface Dimension:** MIL-C-39012 except 75 Ω

### Environmental

- Thermal Shock:** -40° C to 65° C operating; -55° C to 85° C, non-operating
- Moisture Resistance:** 0% to 95%; MIL-STD-202 Method 106
- Corrosion (Salt Spray):** MIL-STD-202 Method 101, Test Condition B
- Flammability:** UL 94-VO rated (center conductor insulator)
- Vibration:** MIL-STD-202 Method 201
- Solvent Resistance:** MIL-STD-202 Method 215

### Finish

- Body/Bayonet:** Tarnish-resistant electroless nickel plating
- Center Conductor:** 50 millionths inch gold plating MIL-G-45204 Type 1, Grade C, Class 1; requires .042" crimp station die

# Broadcast Connectors

## Coax Connectors – Bulkhead Jack Connectors

### Features

- Easier, more reliable termination; gold-plated locking center conductor ensures proper alignment during termination
- 100 percent guided mating
- Exclusive closed-entry contact prevents center conductor damage from non-standard BNCs or test probes
- Eliminates one termination point when used as a bulkhead connector

## Coax Connectors – F Connectors

CommScope's high-performance F connectors are designed for demanding digital applications where a high-quality, high-performance F connector is required. These connectors provide superior return loss (-30 dB to 3 GHz) and are the perfect choice for use in digital headends, satellite down links, and high-performance customer premises applications.

### Features

- All-crimp two-piece design goes together the same as a BNC
- Combines the superior electrical performance of a BNC with the superior RF performance of an F connector
- True 75  $\Omega$  design for performance up to 3 GHz
- Crimp-on center pin provides outstanding connection rather than relying on the copper center conductor of the cable
- Gold-plated locking center pin just like a BNC connector
- Diamond-knurled crimp hub and long .500" crimp sleeve provides higher pull-off force than typical F connector types
- Long 3/8" wrench flats make connector threading easier
- Precision machined parts for greater unit to unit consistency
- Exclusive molded center conductor insulator provides a truer impedance match over PVC and Teflon types
- Same strip and crimp dimensions as our standard BNC plugs, common tooling
- Cable sizes for RG59, RG187, and RG6 available
- Termination plugs in 1% and precision 0.1% available

## Coax Connectors – RCA Connectors

The venerable RCA connector is still the universally accepted method of terminating coaxial cable for audio and video signals in prosumer-type products such as video decks, DVDs, video projectors and HD monitors. CommScope's precision RCA connectors are designed for demanding professional environments, offering a performance-driven product with outstanding mechanical and electrical characteristics, as well as easy BNC-type assembly.

### Features

- Outstanding electrical performance up to 2 GHz
- 50 microinch gold-plated, locking internal center conductor crimps to cable
- Exclusive closed-entry center pin contact RCA pin/receptacle
- Nominal 75  $\Omega$  characteristic impedance end-to-end
- Easy preparation and installation; installs the same as a standard BNC with BNC tooling
- Compatible with hex, square, and 12-point crimp tools and select competitive crimp tool and die sets
- Tarnish-resistant, nickel-plated body; 50 microinch gold-plated center pin, or all gold-plated version (shown)
- Cable sizes for RG59, RG187 and RG6 available; uses same tooling
- Meets or exceeds MIL-STD-202F requirements

### RCA Connectors

#### Electrical

<b>Characteristic Impedance:</b>	75 $\Omega$
<b>Voltage Rating:</b>	1000 Volts RMS
<b>Insertion Loss:</b>	< 0.6 dB 1 MHz to 1 GHz (measured with 1 meter of 728 cable)
<b>Return Loss:</b>	Better than 26 dB up to MHz
<b>Contact Resistance:</b>	.030 $\Omega$ maximum change post environmental
<b>Insulation Resistance:</b>	200 M $\Omega$ minimum change

#### Mechanical

<b>Mechanical Durability:</b>	500 cycles minimum
<b>Center Contact Retention:</b>	6 lbs. min
<b>Cable Pulloff Force:</b>	Dependent on cable size
<b>Cable Bend and Twist:</b>	500 cycles min
<b>Force to Engage/Disengage:</b>	Longitudinal force 3 lbs. typical
<b>Interface Dimension:</b>	See interface detail below

#### Environmental

<b>Thermal Shock:</b>	-40° C to 35° C operating; -55° C to 85° C, non-operating
<b>Moisture Resistance:</b>	0% to 95%; MIL-STD-202 Method 106
<b>Corrosion (Salt Spray):</b>	MIL-STD-202 Method 101, Test Condition B
<b>Flammability:</b>	UL 94-VO rated (center conductor insulator)
<b>Vibration:</b>	MIL-STD-202 Method 201
<b>Solvent Resistance:</b>	MIL-STD-202 Method 215

#### Finish

<b>Body:</b>	Tarnish-resistant electroless nickel plating
<b>Center Conductor:</b>	50 millionths inch gold plating MIL-G-45204 Type 1, Grade C, Class 1; requires .042" crimp station die

## Coax Connectors – Adapters and Bulkheads

### Features

- Improved performance – true 75 Ω characteristic impedance
- Outstanding electrical performance to 3 GHz
- Bulkhead feedthrough available with or without panel isolation
- Meets the performance requirements of MIL-A-55339 for radio frequency coaxial adapters
- Gold-plated, closed-entry contact center conductor to prevent damage during test or mating plug termination

## Coax Connectors – Tools

### Features

- Durable ergonomic handle provides greater comfort
- Fully adjustable for preloading to maintain die set alignment
- Exceptional life, rated for 100,000 crimp cycles
- Available in two handle sizes
- Highest mechanical advantage in the industry, reduces fatigue during crimping
- Precision-manufactured by Pressmaster in Sweden

## ProAx® Triaxial Camera Connectors – Cable Mount

For years, the industry has been locked into connector designs that are difficult to terminate, and even more difficult to field repair. ADC's line of ProAx® Triaxial Camera Connectors will change the way you think about this component forever.

- Field Repairable – no return of cable required
- Gender and Format Reversible – male and female front housing interchangeable and U.S. global formats interchangeable
- Solid Outer Shield Ground
- Sturdy Construction
- Patented Panel-Mount System – 45 and 90° mounting options available
- Compatible with all major manufacturing connectors and uses as well as standard industry tools/dies

## Applications

### High-Definition Ready True 75 W Impedance

The ADC ProAx triax connector line is designed for maximum bandwidth for serial digital and high-definition digital applications while maintaining a true 75 W impedance. All critical path components are gold-plated for outstanding durability and connectivity.

## ProAx® Triaxial Camera Connectors

### Protective Weather Boots

CommScope's triax weather boots provide ultimate protection for your triax connector investment.

#### Features

- Sealed to IP67 specification
- Feature a weather-tight patent pending lip-over seal protection
- Each boot is adjustable to fit any cable size
- Mating cap is attached via stainless steel lanyard, and is hermaphroditic for both male (plug) and female (jack) boots
- Made of a special high-performance UL rated rubber compound that can withstand extreme temperature ranges from -45° C to +55° C

## ProAx® Triaxial Camera Connectors – Bulkhead Mount

CommScope's slim-line versions specifically engineered for OEM camera use and low-profile bulkhead mounting. These new bulkhead connectors retain gender flexibility, field repairability and format reversible features that ensure high-performance.

### Features

- Solder-style termination
- Connectors are gender and format interchangeable
- Field repairable without having to replace the connector or open the camera
- Compatible with industry-standard triaxial connectors
- Reverses between US and global formats in just seconds
- Qualified to demanding MIL-STD 202

**American Standard
