

PIM-GUARD-CABLE-SUPPORTS

Base Product

PIM-Guard® Cable Supports

ANDREW's family of PIM-Guard Cable Support Brackets are designed to support cables for various applications in the Hi-Risk PIM Zone near antenna and radios. Two generations of product are now available in this family.

POLYMER PIM-GUARD

- Our PIM-Guard polymer cable support brackets feature the industry's first all-resin, PIM-free design. The new PGP-Series consists of multiple modular configurations that are used to create cable support brackets with port counts ranging from 4 to 18 – with each port able to accept up to 2 Snap-Tak cable hangers.

PIM-GUARD

- Our PIM-guard (PG Series) Cable Support Brackets are designed with clamps that firmly secure the brackets to antenna pipes, eliminating loose metal connections which can cause PIM issues. Manufactured from hot-dipped galvanized steel, PG Series Cable Support Brackets also eliminate PIM concerns from dissimilar metals or corrosion.

Product Classification

Product Type Antenna/RRU Cable Support

Product Brand PIM-Guard®
